Introducing the **Wireless Multi-Touchpad Mini Keyboard**

The Wireless Multi-Touchpad Mini Keyboard offers performance, value and convenience of wireless connectivity.

**Features and Benefits**

- Plug and play - no additional drivers needed
- Slim, light weight 88-key wireless keyboard - extremely portable
- Multi-touch touchpad with 3-button mouse function, including tapping, scrolling
- Low profile tactile keys for comfort, precise and quiet typing
- 8 hot keys for internet, e-mail and multimedia functions

**Package Contents**

- Wireless Multi-Touchpad Mini Keyboard
- USB wireless receiver
- 2 AAA batteries
- Quick installation guide

**System Requirements**

- PC computer with an available USB port
- Windows® 7 (32-/64-bit) / Vista (32-/64-bit) / XP (32-/64-bit) / Server 2003 & 2008 (32-/64-bit) / 2000 SP4
Specifications

Keyboard
• LED: Low battery indicator
• Batteries: 2 AAA
• Pairing button
• Key press force: 61g ± 9g
• Key switch life: ~ 10 million cycles
• Number of keys: 88 + 8 hot keys
• Operating distance: up to 33ft/10m (max)
• Operating frequency: 2.4 GHz
• Operating mode current consumption: 8mA (max)
• Sleep mode current consumption: 15uA
• Battery life (based on 1 hour use per day): Up to 6 months (max)
• Sleep mode: After 8-10 minutes of inactivity
• Two snap open legs for tilt and height adjustment
• Dimensions: 12 1/4" x 8 11/16" x 3/4"

Touchpad
• Multi-finger touch technology touchpad
• Supports 3-button mouse with tap and scroll
• Built-in left and right mouse button below touchpad

USB wireless receiver
• Input voltage: 5V DC
• Connection interface: USB
• Pairing button

USB Wireless Receiver

Figure 3: USB Wireless Receiver

- **Pairing button** - When the wireless keyboard is not working correctly, press to put into pairing mode with the wireless keyboard

**Setting Up Your Wireless Keyboard**

Use the snap-open legs on the bottom of the keyboard to adjust the tilt/height for your comfort.

1. Plug the **USB wireless receiver** into a USB port of the computer. The driver will install automatically.
2. Insert the batteries into the keyboard.
3. If the keyboard is not working, place the **USB wireless receiver** and wireless keyboard into pairing mode. **Pairing mode:** Re-plug the **USB wireless receiver** into a USB port of the computer, press it's **Pairing button**, then press the **Pairing button** on the bottom of the wireless keyboard. Wait 30 seconds, if the keyboard still does not work, try again. It may take several tries before you are successful.

**Multi-touch Touchpad**

The touchpad of the **Wireless Multi-Touchpad Mini Keyboard**, supports multi-finger touch technology effectively simulating a 3-button mouse with scrolling. See below for supported features.

- **Move cursor**: Slide one finger along the touchpad
• **Left click button**: Tap one finger
• **Middle click button**: Tap two fingers
• **Right click button**: Tap 3 fingers
• **Double click (left mouse button)**: Double tap one finger
• **Drag**: Double tap & hold one finger, then slide finger along the touchpad
• **Vertical scroll**: Slide two fingers vertically

### Numeric Keypad

The Numeric Keypad, indicated by the blue characters integrated into the main keypad, is controlled by turning On/Off Num Lock. Press the **Num Lock** key to enable or disable the numeric keypad according to your typing needs.

**Note**: Some systems turn on Num Lock when the system starts up. This is inconvenient because to use the keyboard normally you’ll have to press **Num Lock** key each time after the computer starts up to turn off the numeric keypad. Fortunately, most systems allow you to change Num Lock in the system BIOS. For more information read your computer’s user’s manual.

### Function Key (Fn)

The function key (Fn) temporarily overrides the numeric keypad, enabling you to type the normal keyboard character instead of the numeric keypad character. The function key works only when the Numerical Keypad is enabled.

1. With the Numeric keypad enabled, hold down the **Fn** key.
2. Press the appropriate key in the numeric keypad.
3. Release the **Fn** key to return to the numeric keypad.
Technical Support and Warranty

QUESTIONS? SIIG’s Online Support has answers! Simply visit our web site at www.siig.com and click Support. Our online support database is updated daily with new drivers and solutions. Answers to your questions could be just a few clicks away. You can also submit questions online and a technical support analyst will promptly respond.

SIIG offers a 3-year manufacturer warranty with this product. Please see our web site for more warranty details. If you encounter any problems with this product, please follow the procedures below.

A) If it is within the store’s return policy period, please return the product to the store where you purchased it.

B) If your purchase has passed the store’s return policy period, please follow these steps to have the product repaired or replaced.

   **Step 1:** Submit your RMA request.
   Go to www.siig.com, click Support, then RMA to submit a request to SIIG RMA. Your RMA request will be processed, if the product is determined to be defective, an RMA number will be issued.

   **Step 2:** After obtaining an RMA number, ship the product.
   - Properly pack the product for shipping. All software, cable(s) and any other accessories that came with the original package must be included.
   - Clearly write your RMA number on the top of the returned package. SIIG will refuse to accept any shipping package, and will not be responsible for a product returned without an RMA number posted on the outside of the shipping carton.
   - You are responsible for the cost of shipping. Ship the product to the following address:

     **SIIG, Inc.**
     6078 Stewart Avenue
     Fremont, CA 94538-3152, USA
     RMA #: ____________________________

   • SIIG will ship the repaired or replaced product via Ground in the U.S. and International Economy outside of the U.S. at no cost to the customer.
About SIIG, Inc.

Founded in 1985, SIIG, Inc. is a leading manufacturer of IT connectivity solutions (including Serial ATA and Ultra ATA Controllers, FireWire, USB, and legacy I/O adapters) that bridge the connection between Desktop/Notebook systems and external peripherals. SIIG continues to grow by adding A/V and Digital Signage connectivity solutions to our extensive portfolio. All centered around the distribution and switching of A/V signals over CAT5/6, these products include matrix switches, distribution amplifiers, extenders, converters, splitters, cabling, and more.

SIIG is the premier one-stop source of upgrades and is committed to providing high quality products while keeping economical and competitive prices. High-quality control standards are evident by one of the lowest defective return rates in the industry. Our products offer comprehensive user manuals, user-friendly features, and most products are backed by a lifetime warranty.

SIIG products can be found in many computer retail stores, mail order catalogs, and e-commerce sites in the Americas, as well as through major distributors, system integrators, and VARs.
