

Dental Office Solution

Challenge

Dental offices need reliable AV technology behind the scenes and waiting areas to streamline communication and critical information between staff, doctors, and patients. As the office grows, they will need a solution that can be duplicable and scalable to meet their growth, simplifies office space, budget friendly, and minimizes additional maintenance cost so staff/doctors can focus on patient care.

Solution

SIIG's dental office solution offers video distribution to provide accurate imagery to facilitate staff communication and instructions, or to entertain patients while waiting. Our splitter (and HDBaseT) technology has low latency to improve staff efficiency and ensure quality patient care. We have solutions to meet the needs of small, medium, and large dental offices that offer easy scalability to grow with you.

Small to Medium Dental Office Solution

The 4-Port HDMI Splitter over Cat6 Extender with IR-40m extends HDMI signals to four HDMI displays over CAT6 cabling. Allows you to distribute high definition video content from 1 source device to up to 4 remote locations up to 130 feet away.

Equipment	4-Port HDMI Splitter over CAT6 Extender with IR – 40m (part # CE-H23U11-S1)
Source Input	Supports 1 source input such as Cable/Satellite box, AV receiver, DVD or PC
Source Output	Supports up to 4 displays

- Extends 1080p signals up to 130 feet to each location over economical CAT6 cables
- IR remote control through CAT6 allows you to control the HDMI source device from the remote display location
- High quality durable metal housing with ventilation panels minimizes electronic interference and provides excellent heat dissipation to ensure reliable performance and system stability during long hours of operation
- Plug and play installation for easy setup

4-Port HDMI Splitter over CAT6 Extender with IR – 40m (part # CE-H23U11-S1)

Small to Large Dental Office Solution

The HDMI HDBaseT 1x4 1080p Extender /Splitter – 150m extends high definition 1080p HDMI signals up to 500 feet from a single HDMI source device to up to 4 remote locations through economical CAT5e/6 cable. This is a perfect solution for larger dental offices and allows smaller dental offices to expand.

Equipment	4-Port HDMI Splitter over CAT6 Extender with IR – 150m (part # CE-H24011-S1)
Source Input	Supports 1 source input such as Cable/Satellite box, AV receiver, DVD or PC
Source Output	Supports up to 4 displays

- Extends 1080p signals up to 500 feet to each location over economical CAT6 cables
- Bi-directional IR extension feature allows for controlling the source device from the remote display location or controlling the display device from the location of the source device
- Power over Cable (PoC) technology allows the Receivers to be powered over CAT cable by one power adapter connected to the Transmitter unit, perfect solution for installations with limited power outlets
- High quality durable metal housing with ventilation panels minimizes electronic interference and provides excellent heat dissipation to ensure reliable performance and system stability during long hours of operation
- Plug and play installation for easy setup

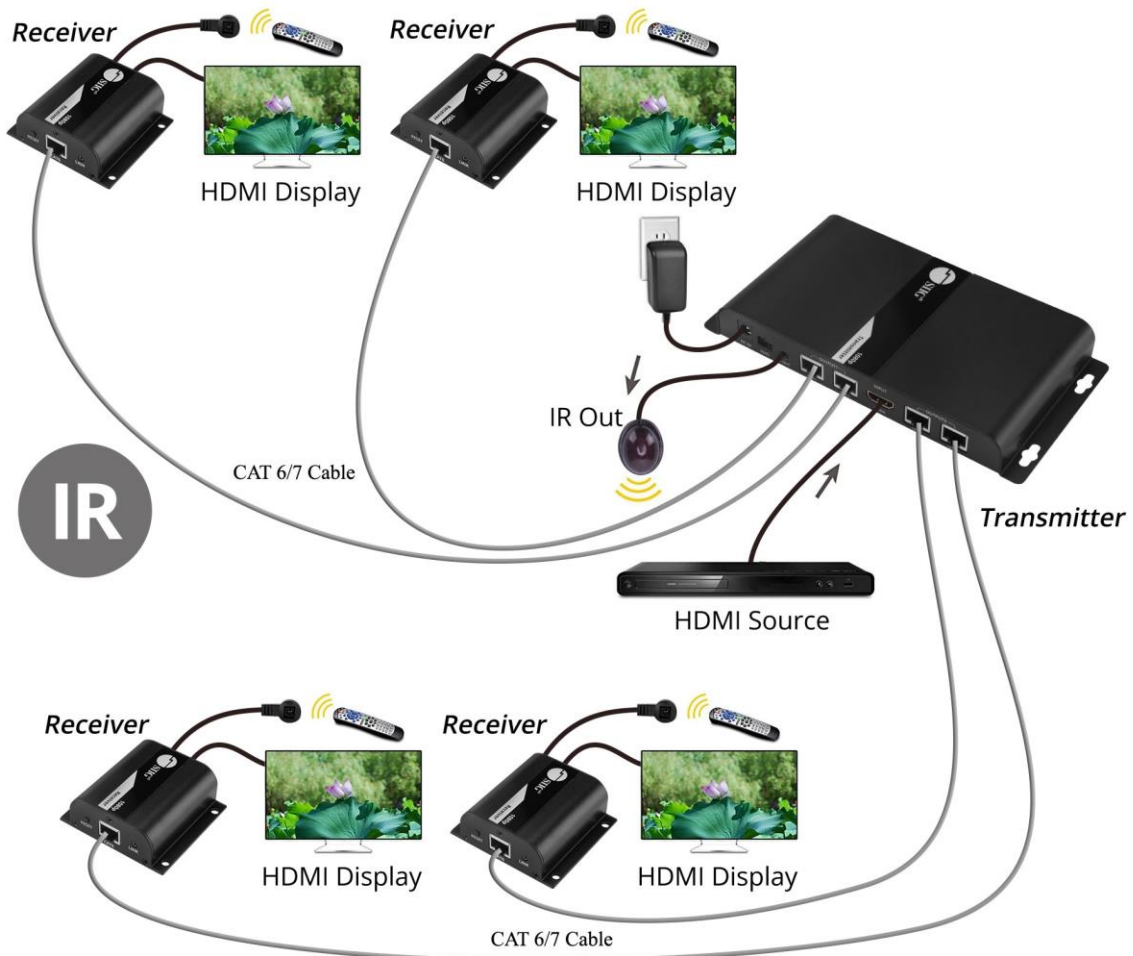

4-Port HDMI Splitter over CAT6 Extender with IR – 150m (part # CE-H24011-S1)

Small to Medium Dental Office

1x4 HDMI Splitter over CAT6 Extender with IR – 40m (part # CE-H23U11-S1)

One Input to Four Outputs

Extend and distribute 1 HDMI source to 4 HDMI displays over CAT6/7 simultaneously

Small to Large Dental Office

1x4 HDMI Splitter over CAT6 Extender with IR – 150m (part # CE-H24011-S1)

Source Device (Cable/Satellite Box, AV Receiver, Blu-ray Player or PC)
