

Game Play & Capture Solution

Challenge

How to stream 4K gameplay to an Elgato HD60 Capture Device at 1080p simultaneously

Solution

SIIG's break-through 4-Port HDMI Distribution Amplifier Solution streams 4K HDR HDMI signals from Game Consoles such as Xbox One X, Xbox One S, PS4 Pro to 4K HDR TV while recording gameplay simultaneously with Elgato HD60 at 1080p. Enjoy stunning HDR 4K@60Hz video quality flawlessly at the same time without ever settling with scaled-down video quality.

Game Play & Capture Solution with 7.1-channel Surround Sound Audio

- Captures gameplay with Elgato Capture HD60 at 1080p and delivers stunning HDR 4K@60Hz video quality flawlessly at the same time without settling with scaled-down resolution
- Distributes HDMI video and audio from a single source to up to 4 HDMI outputs such as game capture device, TVs and AV receiver simultaneously while maintaining signal quality
- High performance auto video scaling feature detects and configures the video resolution automatically according to the capabilities of each connected monitor to allow mixed 4K and 1080p display outputs simultaneously
- All-in-one game capturing, 4K HDR video and 7.1-channel surround-sound splitter solution

1x4 HDMI 2.0 Splitter / Distribution Amplifier with Auto Video Scaling - 4K 60Hz HDR (CE-H22Y11-S1)

Also available: 1x2 HDMI 2.0 Splitter / Distribution Amplifier with Auto Video Scaling - 4K 60Hz HDR (CE-H22X11-S1) – perfect for instant gaming setup without using an AV Receiver
