

AVPRO HDMI Over IP Encoder & Decoder Transceiver

Simply configure it as an encoder (TX) or decoder (RX) using a slide switch

Part# CE-H27P11-S1

The ultimate solution for distributing HDMI signals over a network with scalability, reliability and security

- 1x HDMI in
- 1x HDMI out
- 2x RJ45
- 1x IR
- 1x USB-A
- 1x Audio
- 1x Slide switch (TX/RX)

One to Many (via Cat6/7 cable)

- Easily switch between extending, splitting, or switching your HDMI audio/video signals with a single unit, keeping your setup clean and cost-effective
- Extend your HDMI signal up to 600ft (180m) over a single Cat6/7 cable using point-to-point mode
- Supports video resolutions up to 1080p@60Hz for clear visuals
- Utilize your existing Ethernet network for extension and distribution. Cascade multiple units using standard L2 Ethernet switches for greater distances
- Independent stereo audio transmission over IP ensures seamless audiovisual experience
- Control your remote devices with IR signal extension over IP (20KHz to 60KHz)
- Integrated ESD protection system safeguards your valuable equipment from electrical damage
- EDID pass-through is supported for easy compatibility with your displays. TAA compliant

Common Applications

- Lecture hall, Exhibition, Concert, Shopping center, Town hall meeting, Transportation, Church, Restaurant, Show room, Conference room, Classroom

- 1080p 60Hz
- TX/RX Dual Mode
- one to one 600ft
- 1 to Many/ Cascading
- IR
