

16-port **Industrial** 1000W USB-C PD **Charging Station**

1000W Charging Station:
- 100W: Charges up to 10 USB-C devices
- 60W: Charges up to 16 USB-C devices

Part# ID-US0C11-S1

Charge 16 Devices Simultaneously with this Ultra-efficient 1000W USB-C Charging Station

- Provides 1000W of total power to charge up to 16 USB-C devices simultaneously. Deliver 100W per port for up to 10 MacBooks, or 60W per port for 16 Chromebooks, tablets, or smartphones for fast and efficient charging
***Note: - A 100W charger requires a cable with an E-mark IC that supports 100W (20V/5A) charging.**
- For optimal 60W charging performance, use a USB-C cable rated for at least 60W Power Delivery (PD)
- Support Power Delivery 2.0 & 3.0 (5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/5A) to power a wide range of USB-C devices in critical use cases
- Integrated 24V/41.67A (1000W) power supply with intelligent power allocation delivers 95% power conversion efficiency, optimizing energy use and performance
- Easily accessible power switch conserves energy during downtime, while the built-in LED indicator provides real-time feedback on charging status, enhancing workflow monitoring efficiency
- Built-In safety mechanisms include Over-Current, Over-Voltage, Short-Circuit, and Over-Temperature protection for safe operation in continuous-use environments
- Automatically activates the fan system based on the device's temperature for efficient cooling when needed
- Full metal housing designed for efficient heat dissipation and rack-mountable in a standard 19-inch rack

Common Applications

- Workstation, Classroom, Service center, Retail store, Media center, Library, Testing lab, Airport, Warehouse, Healthcare
