

- 1) Save the files to your hard drive.
- 2) Power OFF the KVM.
- 3) Set DIP switch PIN# 1 to ON (down).
- 4) Power ON the KVM and connect micro USB to PC's USB port.
- 5) Double click "KVM Update Tool.exe".
- 6) Select the correct COM port.
- 7) Click on the **KVM** button to open "KVM Firmware Update" window.

- 8) Check Runtime Code and click the "..." button.
- 9) Select the file "2P-4002U3A\_201012A.bin".

10) Click the “Burn!” button to start firmware update. Wait for the process to finish.

- 11) KVM update is complete.
- 12) Terminate the “KVM Update Tool” software.
- 13) Power OFF the KVM.
- 14) Disconnect the USB cable from the device and PC.
- 15) Set DIP switch PIN# 1 to OFF (up).

The software update process is now complete.
