Hardware Installation

General instructions for installing the card are provided below. Since the design of computer cases and motherboards vary, refer to your computer's reference manual for further information, if needed.

Static Electricity Discharge may permanently damage your system. Discharge any static electricity build up in your body by touching your computer's case for a few seconds. Avoid any contact with internal parts and handle cards only by their external edges.

1. Turn OFF the power to your computer and any connected peripheral devices.

2. Unplug the power cord and remove your computer's cover.

3. Remove the slot bracket from an available PCI slot.

4. Carefully align the card to the selected PCI slot, push the card down firmly, but gently, until it is well seated.

5. Replace the slot bracket holding screw to secure the card.

6. Replace the computer cover and reconnect the power cord.

Driver Installation

The *Hi-Speed USB Dual-Port PCI* has three built-in USB hosts. Two hosts handle USB 1.1 devices and the third host handles USB 2.0 devices. USB 1.1 and USB 2.0 devices are automatically routed to the correct USB hosts.
