Hardware Installation

Note: For Low Profile systems, replace the currently mounted bracket with with the included Low Profile bracket.

General instructions for installing the card are provided below. Since the design of computer cases and motherboards vary, refer to your computer's reference manual for further information, if needed.

Static Electricity Discharge may permanently damage your system. Discharge any static electricity build up in your body by touching your computer case for a few seconds. Avoid any contact with internal parts and handle cards only by their external edges.

1. Turn OFF the power to your computer and any other connected peripheral devices. Unplug the computer's power cord.
2. Remove your computer cover and install the card in an available PCI slot.

3. Push the board down firmly, but gently, until it is well seated.
4. Connect an available 4-pin power connector from the system power supply to the 4-pin power connector on the *FireWire 800 32-bit PCI* board (See **Figure 1** on page 3). This connection is recommended for consistent power output from the FireWire port.
5. Secure the card and replace the cover.

ubSwitch Utility

In order to use a DV camcorder with this controller, Microsoft's FireWire 400 driver must be installed in the system. We have supplied an easy to use utility that allows switching between Microsoft's driver and the FireWire 800 driver. *Before using this utility, unplug all devices from the FireWire 800 PCI board.*

1. Click **Start, Programs, Unibrain ubcore, Tools** then **ubSwitch**.
2. Right click the **ubSwitch** icon located in the system tray by the clock.
3. Click the 1394 adapter that you want to switch, then click on **Microsoft 1394 Drivers**.

Note: If your system has multiple 1394 adapters installed, make sure that you click on the 1394 adapter that the camcorder will be plugged into.

4. Windows will display an information box when the driver is ready for use. It may take a few seconds for this box to appear. Wait for this box to appear then connect your DV camcorder.

Note: To switch back to the FireWire 800 driver, follow the same procedures, but in step 3 instead of clicking on **Microsoft 1394 Drivers**, click on **Unibrain 1394 Drivers**.

Connecting a DV Camcorder

Before plugging in your DV camcorder, verify that the Microsoft FireWire 400 driver has been successfully installed in your system, see **ubSwitch Utility** on page 8, then follow the steps below.

1. Connect the 4-pin connector of your FireWire 400 DV cable to your camcorder.
2. Connect the 6-pin connector of the DV cable to the FireWire 400 port.
3. Power on the DV camcorder. The camcorder should appear in **Device Manager**.

To Verify DV Camcorder Setup

1. Right click **My Computer**, click **Manage**, then click **Device Manager**.
2. Double click **Imaging Device(s)**. **Microsoft DV Camera and VCR** or **DV Camcorder** should be displayed.
