Pairing Instructions

If your system is not responding to the wireless keyboard, please follow the instructions below.

1. Unplug the Wireless Nano Dongle.
2. Press the wireless keyboard's pairing button located on the back of the keyboard. The wireless keyboard will stay in pairing mode for 9-10 seconds and the battery indicator light will be lit.
3. Re-plug the Wireless Nano Dongle into the same USB port.
4. The wireless keyboard's battery indicator light will go off when the pairing process is complete.
5. If the system is still not responding to the wireless keyboard, try steps 1-4 again. It may take several tries before successful.

Note: Please keep these instructions for future reference.
