Note: This device can be powered from the HDMI source device (by HDMI input port) directly. However, when the transmission/connection is not stable, or the output is not fluent, please connect Micro USB cable to the DC5V port for power supply.

## Application

### Point to point connection

### Many TX to one RX connection

## NOTE:

1. When the wireless signal transmits through wall, glass or other obstacles, it will cause signal loss. Please install this device in a good environment with few obstacles.
2. The external environment wireless signal will affect transmission, such as micro waver wireless mouse and keyboard etc.

FCC RULES: TESTED TO COMPLY WITH FCC PART 15, CLASS B  
OPERATING ENVIRONMENT: FOR HOME OR OFFICE USE

### FCC COMPLIANCE STATEMENT:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
