Package contents

- USB 3.0 AOC Male to Female Active Cable
- Quick Start Guide

System Requirements

1. PC with an available USB 3.0 female port

Noted: After long-distance transfer power will attenuate to 5V/800mA. If use high power USB devices in the cable end, it's recommended to use the device's self-power adapter.

Try it before you install it!

There are thousands of USB devices on the market. This cable has been tested with various devices and host types. However, the only way to ensure that it works in your application is to try it.

Noted: In order to avoid cable defective, please do not cut or bend too tightly this cable and also not pull on the connector
