INTRODUCTION

The AV-GM0463-S1 HDMI Extender over Single Coax with RS-232 boosts up your HDMI transmission range up to 90m (295t) in HDTV 1080p format through single coaxial cable. AV-GM0463-S1 is easy to install and works perfectly with Belden 1694A coaxial cables. Other coaxial cables can also work with AV-GM0463-S1 and the transmission distance depends upon the quality and bandwidth of coaxial cables. In addition, AV-GM0463-S1 is also equipped with RS232 local loopout. This bonus feature allows users to rely on the same coax cable to have RS-232, such as TV and BD players, and AV-GM0463-S1 makes RS-232 control possible through only single coax cable along with high quality HDMI A/V signals.

The AV-GM0463-S1 includes two units: transmitting (AV-GM0463-S1[TX]) and receiving (AV-GM0463-S1[RX]) units. The transmitting unit is used to capture the HDMI and HDCP input signals and carry the signals through only coaxial cable. The receiving unit is responsible for auto equalizing the transmitted HDMI multimedia data. The transmission range between the sending and receiving units can be up to 90m (295t) under Full HD (1080p) with 7.1 channel audio.

FEATURES

- Support HDMI Deep Color
- HDCP compliant
- Single coaxial cable
- 7.1-channel audio supported
- Extends the transmission range up to 90m (295ft) from the HDMI sources under Full HD resolution (1080p60 24-bit color depth) through Belden 1694A coaxial cable.
- Video resolutions support 480i, 576i, 720p, 1080i, and 1080p
- RS-232 control
- Wall mounting housing design for easy and robust installation

The length depends on the characteristics and quality of the coax cables. Higher resolutions and longer transmission distances require low skew cables for best performance. Solid and shielded coax cable such as Belden 1694A with metal $75\Omega BNC$ connectors is recommended.

NOTICE

Since AV-GM0463-S1 is sensitive to the HDMI source's input jitters, the input HDMI signals with larger jitters will shorten the transmission distance hugely, especially for full HD 1080p@60!

- 1. The lab testing result shows that Belden 1694A coaxial cables can transmit HDMI signals up to 90m (295ft).
- 2. If your HDMI display has multiple HDMI inputs, it is found that the first HDMI input [HDMI input #1] generally can produce better transmission performance among all HDMI inputs.
- 3. Please noticed that audio must be 48KHz and 480p is not supported.
